About Lawns

Success with lawns depends upon certain important factors such as soil condition, proper preparation of the ground, good pure clean grass seeds of suitable mixtures, ample food and moisture supply, and proper care.

Our help is yours for the asking in determining how best to meet your particular conditions.

Our seeds are absolutely the highest quality obtainable, both in germination and in freedom from weed seeds and foreign matter.

Used and cared for properly they will make permanent, satisfactory and beautiful lawns.

Take care of your lawns. Feed them moderately both in the Spring and in the early Fall, with a reliable fertilizer, and water thoroughly in dry weather.

A good rolling with a moderately heavy roller in early Spring is desirable, but if the soil is heavy do not roll when the ground is wet.
